Let's Get Crafty	Bring your imagination to the table in this fun-filled crafts class full of pom poms, googly eyes, construction paper and more! Let your creativity reign as the only requirement is to have fun while crafting with classmates!
Scratch	Use MIT's coding software Scratch for Art, Music, Science, Social Studies, and Math! Work together to create projects across a wide variety of subjects. Create games, animate stories and play with sound. You'll see that Scratch is so much more than coding!
Colorful Chemistry	Bubble, Fizz, Pop! Make things bubble, change colors, and implode in this hands-on chemistry class. Learn the basics of chemical reactions, how substances combine and how to impress your friends with cool experiments. Bring your lab coat, this class is sure to be a blast!
Building Bonanza	Build, create and challenge yourself to make super structures! Test your building and engineering skills using a mountain of building tools--Legos, Straws and Connectors, Contraptions, Marble Runs and more! Grab a friend and spend the afternoon creating!
